

Lesson Plan- Soil and its types

Subject: Geography **Chapter:** Soil **Topic:** Soil and its types **Class :**7

(This Problem is an extended part of the project work that students have already done on Soil)

Problem Statement

Ms. Ankita is planning to go to her village since many days but she has a variety of plants in her home garden which need watering daily and might die if not watered properly in her absence. She can no longer postpone her trip to her village and must travel urgently. Design a machine that can solve her problem.
