

Lesson Plan - Physical and Chemical changes

Subject: Science Chapter: Types of Changes Topic: Physical & chemical changes

Learning Objective of the lesson: students will be able to gain knowledge of physical and chemical properties. And the difference between physical and chemical reactions . daily use substance as it helps to optimally know about its maximum advantages and types of uses .

Activities:

1. Discuss the concept of physical and chemical changes with the students to understand what they know about the topic.
2. Students will conduct an internet search to answer the following questions:
 - a. What is physical and chemical change?
 - b. Properties of physical and chemical change.
 - c. Difference between physical and chemical change.
 - d. Manmade and natural change
 - e. Examples of physical and chemical change
3. The class is then divided into 2 groups
4. One group, will create a powerpoint presentation about physical and chemical changes
5. The second group will use Scratch to create a quiz/game on physical and chemical changes.
