Lesson Plan - Reflection of Light

Subject: Science   **Chapter: Reflection of Light**   **Topic: Fire**

<u>(This Problem is an extended part of the project work that students have already done on Reflection of light)</u>

Those who live in Mandala area of M-Ward, Mumbai already know that every year fire breaks out many times in the basti and due to which lot of loss of life and infrastructure happens. You being and active citizen want to do something about it.

Create a solution to this real life problem which will help all the people live around the area. You can create a device / plan / prototype of the solution to the given problem. You can use any application and tools of your choice however a few are suggested below:

1. Arduino
2. mBlock
3. Scratch
4. Python
5. Spreadsheet
